+ PROJECTS PORTFOLIO

client: Duffle (startup)

Duffle (available on app store and google play) is a mobile application for people traveling around the world via planes. They can buy duty free products and pick them directly on airport gate. It was MVP project started from scratch for german startup. Technology stack consists of Spryker e-commerce enterprise system (PHP 8, Docker, Jenkins, RabbitMQ, Elastic Search) for the back-end application and React Native for IOS and Android application. System is running on AWS and first beta version was launched at December 2022.

client: MyWorld (corporate)

My World is the largest loyalty application in the world where you can collect points during e-commerce shopping. The system can handle **5 millions** of products per one shop and system was scaled for 70 countries. The technology solutions used in project were: Spryker e-commerce enterprise system (PHP 8, Docker, Jenkins, RabbitMQ, Elastic Search) and Type Script with web pack,html and css for front end purpose. Project is hosted on AWS cloud with enormous traffic on it.

client: PZU (corporate)

Internal corporate application for companies who collaborate with PZU in terms of vehicle services in Poland. Technology stack consists of: Symfony, Bootstrap, jQuery and Nginx. The application was rewritten from monolith to micro service architecture.

client: Lufthansa (corporate)

Project for managing human resources in terms of recruitment processes. Beesite is leading german software used in hr departments by: Porsche, Rossmann, Lufthansa and others. Project is being kept in 5 different versions providing different functionalities for 70 clients so in total there were 350 running live projects. Technology stack used in project was, PHP (own framework), jQuery, Bootstrap,MySQL, Elastic Search and Nginx.

client: PARP (government)

Work time tracker application for all internal departments used in polish government EU institution enabling also collecting petitions for European Union funds. The technology stack was Symfony Api Platform for Rest api application and Node JS for front end application.

client: Getin Bank (corporate)

Application for migrating from one of the seven banks to Getin Bank, integration with seven different banks -> PKO, BZWBK, Alior Bank, Milenium, Mbank, Credit Agricole, Deutsche Bank. The stack was Zend Framework, PostgreSQL and PHP UNIT. The project received **banking application europe award**.

client: Aviva (corporate)

Development of e-commerce platforms and services for car insurance department. I was providing excellence online buying services accessibility and developed new monitoring tool reporting live breaks with all e-commerce

functionality. I had also done the application gathering all phone numbers from Olx.pl – leading Polish e-commerce platform for marketing purposes. Technology stack consists of Zend Framework, RWD, PHP, Symfony and others.

client: Procter and Gamble
(corporate)

Developing Facebook applications (PHP) and maintaining CMS (.NET) system for marketing purposes for South and North America business department unit. The technology stack was Facebook API, Zend Framework, MySQL, .NET and Microsoft SQL servers, hosted on Apache servers.

+ EDUCATION
